

ABOUT US

Since our establishment in 2003, Infront Consulting has been a leader in IT and Cloud Solutions, with our mission focus of enhancing team efficiencies, accelerating system performance, and harnessing the power of the Cloud for businesses across diverse industries and sizes. Over the years, we've evolved from pioneering Datacenter Management solutions to offering cutting-edge Cloud, Development, and AI solutions.

Our acquisition by CelcomDigi Group in 2021 was a pivotal moment, fortifying our position and granting us increased strength, synergies, and competencies to address larger market segments. Today, Infront is a complete end-to-end bespoke IT solution provider, focusing on Cloud Solutions, Software Development, Scale Connectivity and Managed Services.

Infront maintains our own local Managed Services Center, capable of providing 24/7 support. Additionally, Infront is now able to augment our solution stack with CelcomDigi's robust nationwide connectivity platform.

With more than 200 successful projects deployed over the years, including for some of the largest Enterprises in the country, and an experienced team of highly-skilled consultants and engineers, Infront is committed to a value-driven and customer-centric approach, with solutions designed to deliver tangible business impact and solve customer pain-points.
