From Start-Up to Scaled Up, Microsoft 365 Has You Covered

Microsoft 365 gives small companies the tools to automate, analyze, collaborate, and secure, just like the big players. If you're a team of 0-50 employees, these tools can help you work smarter, collaborate faster, and scale confidently without hiring more people.

How inSuite LITE Solves Real Problems for Small Business Owners

“We’re already small. We can’t afford to waste money.”

We tailor your Microsoft 365 setup so every staff **ONLY uses what you’re already paying for:** email, files, meetings, docs. Nothing wasted. **Plus, we also outsource IT staff at more affordable cost than in-house hiring.**

“We waste time fixing small IT issues ourselves.”

We handle all the IT work: user setup, managing permissions, email issues, resetting passwords, and device access for you—like **an outsourced IT helpdesk**. You don’t need any technical skills.

“Me and my team don’t have time to learn another complicated system.”

User guides and training will be provided. Furthermore, our managed services are available to support 8x5 hours. You **can contact us easily** from WhatsApp, email, Teams, and more.

“We just want our company to look and operate professionally.”

Get a **proper business email address** (e.g. *name@infrontconsulting.com.my*), **structured file storage**, Microsoft **productivity and conferencing tools** (Word, Excel, PowerPoint, Teams) across devices.

“We’re worried about getting exposed to cybersecurity (but we also don’t want to spend too much..)”

We apply basic security as needed: link restrictions, file access, device controls—so your data isn’t exposed without you knowing, while spending minimally.

“We’re onboarding new staff but don’t have a process as a small company.”

We help you **onboard smoothly**—creating accounts, giving access to the right files, setting up apps, and removing access when someone leaves.

“I don’t want to be the only person who knows how to do things.”

Centralise all your SOPs, checklists, and training guides in Sharepoint—**centralized and accessible to everyone**. *Easily* remove and add new employees (freelancers, remote workers) with our Managed Services

“Our files are everywhere—Google Drive, USB, WhatsApp”

We centralize all your documents into OneDrive & SharePoint, with the right folders and access for the right people.

REAL RESULTS

"MISC would like to thank Infront in successfully implementing MISC's System project. Despite several obstacles, the team has managed to overcome them and we are grateful for their flexibility and knowledge."

OOI BOON HOW

COMPUTING SERVICES MANAGER,
MISC BERHAD

"The team goes way above and beyond their initial mandate and are quick to point out issues that are beyond their scope. They maintain an excellent relationship with the customer and fosters a deep sense of trust in their work."

DAVID BROOKS

CLOUD SOLUTION ARCHITECT,
MICROSOFT

"My guys are very happy working with the Infront Consultant and I always hear them saying how happy they are that they are working with Infront. Your guys always add value and is very open in sharing. My team has said the Infront team has on many occasions help them on other areas even other than SCCM."
