Note: Not all features/product logos shown.

# From Start-Up to Scaled Up, Microsoft 365 Has You Covered

Microsoft 365 gives companies the tools to automate, analyze, collaborate, and secure, just like the big players. If you're a team of 50-100 employees, these tools can help you work smarter, collaborate faster, and scale confidently without hiring more people.

# How inSuite **POWER** Help Growing Business Owners

*"We've grown, but our tools still feel all over the place."*

☛ We restructure your Teams, OneDrive, and SharePoint with folders, permissions, and naming rules, **so everyone knows where to work, store, and find files.**

*"I'm worried someone's going to click the wrong thing and expose client data."*

☛ We apply security settings like file link restrictions, MFA, permission tracking, shared inbox control, and backup retention **so staff can't accidentally leak confidential info**—all without enterprise overhead.

*"I'm always guessing what tools we're actually using and paying for."*

☛ We map your license usage and assign tools properly, so there's no waste, no confusion, and no overlapping apps.

*"I don't even know if ex-staff still have access to company files."*

☛ We manage user exits end-to-end: disabling accounts, revoking app access, unlinking devices, and transferring ownership of files. You don't need to waste time double checking.

*"People keep asking me where files are. Some save on desktop, some in WhatsApp."*

☛ We centralize your files in SharePoint and OneDrive, give the right access to each team, and train staff how to use it—no more 'where is it?' problems.

*"One staff deleted a folder and we only found out 2 weeks later. We had nothing to recover."*

☛ Guard yourself with daily backups for all emails, Teams files, OneDrive and SharePoint, so you can restore anything, anytime.

*"Every time someone has a login problem, it ends up on my desk."*

☛ Your staff comes to us directly—we handle user setup, email issues, access problems, and reset requests with 8x5 support.

*"It's getting hard to onboard people fast. We're hiring more now."*

☛ We build onboarding templates by role—new staff get pre-approved access to folders, apps, calendars, and Teams channels.

# REAL RESULTS

*"MISC would like to thank Infront in successfully implementing MISC's System project. Despite several obstacles, the team has managed to overcome them and we are grateful for their flexibility and knowledge."*

**Ooi Boon How**

COMPUTING SERVICES MANAGER,  
MISC BERHAD

*"The team goes way above and beyond their initial mandate and are quick to point out issues that are beyond their scope. They maintain an excellent relationship with the customer and fosters a deep sense of trust in their work."*

**David Brooks**

CLOUD SOLUTION ARCHITECT,  
MICROSOFT

*"My guys are very happy working with the Infront Consultant and I always hear them saying how happy they are that they are working with Infront. Your guys always add value and is very open in sharing. My team has said the Infront team has on many occasions help them on other areas even other than SCCM."*
